

Gasket sheet AF-1000 type 226

Application:

Sheet recommended for high temperature flange connections, with high pressure jumps and high speeds of flow through the systems; it is characterized by high mechanical strength; it is recommended for automotive industry; is not recommended for application in steam, acids and bases

TECHNICAL PARAMETERS

Standards satisfied and approvals	WT-78/99/B Atest Państwowego Zakładu Higieny
Classification per DIN 28091-2	FA-AM1-St
Basis	Aramid fibres, mineral fibres, NBR, steel net
Density	2,3
Maximal operating conditions:	
Peak temperature	420 ⁰ C
Continous temperature	350 ⁰ C
Continous temperature in steam	250 ⁰ C
Pressure	12 MPa
