

Glass lacquer sleeving class C (<180°C)

Glass braid impregnated with silicone lacquer
Coated glass braided with silicone varnish
Glass braid processed at high temperature
Glass braid - hose without impregnation
Hose Kevlar

Glass braid impregnated with silicone lacquer

Standard – IEC 684-3

Technical information

- Continuous operating temperature – from -60°C to +250 °C
- Peak temperature /max/ - +290 °C
- Dielectric strength – from 1,5 kV to 10 kV
- Flammability – self extinguishing
- Resistance to UV rays
- Interaction with water – waterproof
- Flexibility – very flexible
- Good welding resistance
- Good mechanical strength
- Resistance to transformer oil under the UTEC 93641
- Good compatibility with most impregnating lacquers

Sizes:

- Color, standard – tile red
- Other colors on request – grey, green, red, blue, white, yellow

Coated glass braided with silicone lacquer

Standard – IEC 684 – 2

Technical information

- Continuous operating temperature – from - 60°C to +350 °C
- Peak temperature /max/ - +400 °C
- Dielectric strength – 1 kV
- Flammability – self extinguishing
- Resistance to UV rays
- Interaction with water – waterproof
- Flexibility – very flexible
- Good welding resistance
- Good mechanical resistance
- Resistance to transformer oil under the UTEC 93641
- Good compatibility with most impregnating lacquers

Sizes:

- Color, standard – natural

Glass braid processed at high temperature

Standard – IEC 684 – 2

Technical information

- Continuous operating temperature – from - 60°C to +450 °C
- Peak temperature /max/ - +550 °C
- Dielectric strength – 0,8 kV
- Flammability – self extinguishing
- Interaction with water – waterproof
- Flexibility – very flexible
- Good welding resistance
- Resistance to transformer oil under the UTEC 93641
- Good compatibility with most impregnating lacquers

Sizes:

- Color, standard – silver grey

Glass braid – hose without impregnation

Standard – IEC 684 – 2

Техническа информация

- Continuous operating temperature – from 60°C to +450 °C
- Peak temperature /max/ - +550 °C
- Dielectric strength – 0,4 kV; 0,8 kV
- Flammability – self extinguishing

- Interaction with water – waterproof
- Flexibility – very flexible
- Good welding resistance
- Resistance to transformer oil under the UTEC 93641
- Good compatibility with most impregnating lacquers

Sizes:

- Color, standard – white
- Package – 25 m; 50 m; 100 m; 200 m

Normal inside diameter, mm	Tolerance to the indoor diameter, mm	Wall thickness, mm		Standard package, m
		min	max

Hose Kevlar

Standard - NG G 39 – 003

Technical information

- Continuous operating temperature – from - 60°C to +250 °C
- Peak temperature /max/ - +330 °C
- Dielectric strength – 0,4 kV
- Flammability – self extinguishing
- Interaction with water – waterproof
- Flexibility – very flexible
- Very good mechanical resistance
- Excellent wear resistance
- Good welding resistance
- Excellent resistance to chemicals, fuel, lubricants and salt water

Sizes:

- Color, standard – yellow
- Package – 200 m; 500 m

Normal inside diameter, mm	Tolerance to the indoor diameter, mm	Wall		Standard package, m
