

Glass lacquer sleeving class B (130°C)

Glass mesh coated with PVC electrical insulation lacquer

Standard – IEC 60684 – 3

Technical information:

Continuous operating temperature – from -20°C to + 130°C

Peak temperature /max/ - +160°C

Dielectric strength – 3 kV

Flammability – self extinguishing

Interaction with water – waterproof

Flexibility – very flexible

Good welding resistance

Good mechanical strength

Resistance to transformer oil under the UTEC 93641

Good compatibility with more impregnating lacquers

Sizes:

Diameter, external – from 0,5 mm to 12 mm

Wall thickness, min – from 0,20 mm to 0,40 mm

Color, standard – yellow

Other custom colors – green, red, blue, white

Packaging – 100 m; 200 m
